

# Web & App Development

Mike Jenkins

## Markdown Practice

### Overview

1. Sign in to GitHub.com and create a new repository named `markdown-practice`.
2. To the repository, add a new markdown file called `practice.md`.
3. Add content and apply some basic styling to your markdown file.

### When Finished With This Activity

Show me your finished markdown file before you leave today.

### Helpful Resources

- Check out the markdown cheat sheet online.
- How to indent bullets in a markdown bullet list/unordered list

### Specifications

Include the following info in your markdown file:

- The name of our Career Tech program (Web & App Development) as a size one heading
- Your **first and last name** as a size two heading
- The name of this assignment (Markdown Practice) as a size three heading
- Use markdown to add a classroom-friendly photo to your markdown file
- Add two links to your markdown file
  - Link 1 will point to the amazon.com home page
  - Link 2 should point to a YouTube Python video for beginners
- Use a pair of triple backticks to add a Python print statement to your file
- Add a size two heading that reads **About Me**
  - Include as bullet points two cool facts about yourself
  - Use markdown to make the first fact **bold**
  - Use markdown to *italicize* the second fact
